

MAKE YOUR WEEKENDS MORE FUN

WE'VE GOT TWO WORDS FOR YOU...

PIONEER SATURDAYS!

Saturday Sept. 12 & 26 | 10am-2pm

Stay Socially Distant in our Outdoor Museum

with protocols designed to promote cleanliness and comfort,
physical distancing, and reduced contact.

**YOUR STUDENTS & GIRL SCOUT TROOPS ARE INVITED TO EXPERIENCE
PIONEER SATURDAYS! PLEASE USE THE COUPONS BELOW TO RECEIVE
\$1 OFF EACH ADMISSIONS TICKET.**

Explore original buildings that represent commerce, transportation and home life as it was in many rural Florida communities just before the turn of the 20th century. Stroll through four acres shaded by majestic live oak trees, where you will encounter historical interpreters who are ready to share the activities and experiences of Florida's rural pioneers.

**Florida Students Coupon Code:
KIDSFL**

**Girl Scout Coupon Code:
GIRLSCOUTFL**

Grow your Own Food from Kitchen Scraps

Try out growing your own food at home! Did you know that you can use kitchen scraps to start your own kitchen garden?

- If you have leafy vegetables that grow in a head from a base, like lettuce or cabbage, cut off an inch or so of the base and save it in a glass or bowl of water. When you see new growth forming, transplant it into soil and voila, you're growing your own greens!
- Next time you're eating citrus, like oranges, limes, or lemons, save the seeds! Clean them and keep them in a wet paper towel. Then plant them in a soil-filled container, and keep it warm and moist! Once it gets big enough, you can replant it in a bigger pot or in your yard and you'll be well on your way to having your own citrus trees!
- Try growing your own berries or tomatoes! You can try planting the whole or sliced fruit in a pot in your home and waiting, but for better results, germinate the seeds first. Separate the seeds from the fruit, and store them wrapped in damp paper towels in a plastic bag. Once they're starting to sprout, you can plant them!
- For a potato or an avocado pit, you'll need toothpicks and a glass of water. Spear the toothpicks into the pit or potato and use them to prop it up at the top of the glass—part in the water, part out of the water. Make sure you keep an eye on the water level day to day and keep it regular! Soon it will sprout and start forming roots, and you'll be able to plant it in soil!

Remember that animals and insects would love to eat your new produce as well, so take good care of your new plants so that they can feed your family!
